

## **Watch Analyst Supervisor**

### **Overview:**

AcuTech Group, Inc. (AcuTech) has an immediate opening for an Infrastructure Protection Watch Analyst Supervisor for a client in the Washington DC area. AcuTech is a global consulting company offering a full range of management and technical consulting, training, and software products related to chemical process security, process safety management and homeland security.

### **Position Description:**

This position will serve in a national operations center for a US Government client where the mission is to maintain situational awareness by collecting, maintaining, and sharing information about threats to the Nation's infrastructures. The successful candidate will coordinate and evaluate infrastructure data for accuracy, importance, and implications and provide recommendations to critical infrastructure partners and client leadership. During periods of significant incidents, the Watch Analyst III will also support decision making for actions required 24–72 hours before and after an incident or event.

As a supervisor of a small 24/7 team, the Watch Analyst III is also expected to implement directives and operations orders from higher headquarters utilizing their leadership skill and operational employment concepts. They will formulate plans and establish policies for unit administration, operations, training, and coordinate staff administration, operations, intelligence, planning, and programming to ensure mission accomplishment. Additional responsibilities include performing, supervising, the work of more junior watch analysts, as well as directing, observing, and evaluating the effectiveness of training programs, availability and mission readiness of assigned crews, and operation and adequacy of support activities.

This position provides an excellent opportunity for personal growth for someone wanting to work in the homeland security arena at the federal level.

### **Skills, Experience and Qualifications:**

- Master's Degree in a related discipline (Management, Operations, or Information Systems), or a combination of education/technical training and equivalent experience.
- Minimum of seven (7) years of related experience with at least five (5) years of specialized operations center management experience.
- Working knowledge of the National Infrastructure Protection Plan and national preparedness programs being implemented in support of Homeland Security Presidential Directives No. 5 (Management of Domestic Incidents), No. 7 (Infrastructure Protection) and No. 8 (National Preparedness)
- Strong writing, research, analytical and communication skills
- Have strong multitasking skills and be able to work independently upon assigned tasks.

- Proficient in Standard Microsoft Office Computer Skills including PowerPoint, Word, Excel, Access
- Experience in the chemical, oil and gas industry is highly-desirable
- **Position requires an active US Secret clearance to start with eligibility for TS/SCI to be granted at a later date if required**

**Additional Information:**

- Positions will be based at a government client's locations in the Washington DC and Northern VA area
- The Watch Analyst-III will work a 5x8 shift, Monday thru Friday
- Competitive salary will be commensurate with experience

**About AcuTech:**
