AcuTech Consulting Group is a global consulting company offering a full range of management and technical consulting, training services, and software products to the public and private sector to identify, evaluate and manage risks in order to continually improve safety, security, health, environmental, and operational performance. AcuTech offers a unique background in chemical process safety, risk analysis and management, design, operations, inherent safety, fire protection, and security that provide our clients with practical, cost-effective solutions for the challenges of process safety management, risk management and chemical security management.

Although our scope of services include regulatory compliance with federal, state and local requirements, AcuTech's abilities extend beyond these standards to enable us to deliver advanced services that meet the higher level of safety demanded by changing world circumstances.

Through our services, we help our clients to:

- protect employee and public health and safety,
- reduce the chance and impact of process accidents and intentional harm,
- communicate risk to the public,
- comply with government regulations,
- avoid adverse environmental impact,
- reduce liability exposure, and
- improve business performance.

For more information contact Janet Colbert at 866-427-0863 or jcolbert@acutech-consulting.com, or the office nearest you, to discuss your security and safety needs and request a quote for services.

Training

AcuTech Training Institute (ATI) provides superior-quality, practical training courses, seminars, and workshops on process safety, chemical security and risk management. We are dedicated to providing a high-value solution for your training needs and are well known for our expert instructors. We regularly offer scheduled public courses on PSM, PHA and related topics and also provide customized on-site training for your facility. Specific workshop examples related to your facility can also be incorporated. Key training clients have included: US EPA, US OSHA, DHS, USCG and API University. We can provide training on almost any process safety, chemical security and risk management topic. Popular courses include:

- Security Vulnerability Assessment
- Security Personnel Training (FSO, ISPS)
- Conducting Incident Investigations
- Human Factors in Process Safety
- Quantitative Risk Assessment
- Best Practices in Process Safety Management
- Process Hazards Analysis for Team Leaders
- PHA Revalidations & Advanced Topics (LOPS, SIS)
- Using PHA-Pro for PHA Studies
- Auditing PSM/RMP Programs
- Mechanical Integrity Program Management
- other PSM, RMP, Security, Fire Protection topics

Software

AcuTech is a Value Added Reseller of software product lines that greatly assist companies with risk management and process safety, and improve business performance. We also provide training for these products. As the only official USA reseller of Dyadem products we can offer regional support and training from our offices (Dyadem is located in Canada). For software pricing, information and demonstrations please contact Janet Colbert at jcolbert@acutech-consulting.com. We also can assist you with information on DNV PHAST and Safeti.
